User Test #002

Please state your name and give your consent

Hi I'm Kevin Lozano and I consent to this interview.

Alright. So if you were to use Loading.js, how would you go about using it?

Just right off the bat? I'm not really sure, but I'll start with size. I'll put one.

Now if you're not sure you can check the docs.

Okay. Okay that's much better now that's pixels. Okay. alright. I'm actually going to go with these presets, I haven't used a windows machine in a while. Speed? A Speed of one sounds good. And a weight of one also sounds good. And now test new loader. Wow that's tiny. [laughter] in hindsight maybe a one pixel loader isn't the best idea ever but it's pretty self explanatory though. Little help from the docs. Okay I like that a lot.

So did the errors help you at all?

Oh absolutely. If I was missing a field, a cute little 'missing: speed of 5' and weight. Yeah, I like that.

Awesome. Um, is there anything that you wish would be there or not be there?

In control, no? This is what I would expect to create a loading circle. Or a loading - any type really. I don't think there's something that could be added to it.

Alright, is there anything that you would change, what would it be.

Anything that I would change? Um -

Or move around.

Maybe rather than using hexedecimal colors, maybe just use regular name colors.

[roommate came in without knocking...]

Awesome thank you very much, do you have any questions or comments, last minute?

No I'm okay, thank you.

Awesome thank you very much.
